

Latest News and Updates on the LIFEx project

LIFEx Immersive Learning Experience Pop-up Session for Trainers

LIFEx project consortium has finalised the LIFE ILxs scenarios!

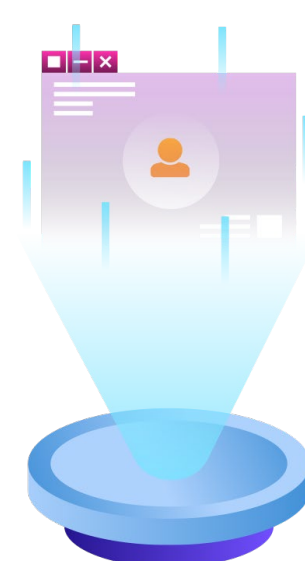

Between the 20th and 22nd of June, the project team met in person for its second Transnational Project Meeting, which comprised the **LIFEx Immersive Learning Experience Pop-up Session for Trainers**. The event was hosted by the leader partner FIP - Future in Perspective in the rural town of Virginia, Ireland. On this occasion, the consortium had the chance to test and train using the LIFEx Immersive Learning Experiences through the scenarios created by the VR developers at ISQe; our project partner from Portugal. After testing, partners made suggestions how to improve these experiences before testing them in their respective countries.

Upcoming Events

The project entered in its final phase. After realising the ILxs scenarios and Evaluation Tool in all partners' languages, the partnership is preparing to organise their internal **piloting test**, which will serve **the national multiplier events**. Each partner will organise a training activity at the national level involving 30 participants making use of the tools and materials developed throughout the LIFEx project.

These events will promote the importance of LifeComp framework through the activities elaborated in our project. We look forward to see the outcomes of our partnership in this final step!
